

FEN+ | Fentanyl+ Test Kit

The SwabTek Fentanyl+ Test Kit is a single-use spot-test designed as a multi-drug screen for FENTANYL and a number of MAJOR FENTANYL ANALOGS, as well as a number of other MAJOR NARCOTICS, including select synthetic opioids, amphetamines, and other cyclic amines. The intuitive form factor makes it simple and safe to screen for narcotics in any sample, or on any surface. The test is capable of identifying the presumed presence of fentanyl and other narcotics in very small quantities, with a level of detection as little as 3 µg in mass for certain fentanyl compounds. Based on third-party validation, the test is verified to test for the following:

- **Fentanyl Class Narcotics:** *Fentanyl HCl, Carfentanil, Lofentanyl, Remifentanyl, Sufentanyl, 2-fluoro-ortho fentanyl, etc.*
- **Synthetic Opioid Class Narcotics:** *Heroin, Meperidine, etc.*
- **Amphetamine Class Narcotics:** *Meth, MDMA, D-Amphetamine, Ephedrine, Pseudoephedrine, etc.*
- **Other Cyclic Amine Narcotics:** *PCP, Ritalin, Thorazine, etc.*
